

Elizabeth Rodriguez

Software Engineer

elizabethyoannie2020@gmail.com • San Juan, Puerto Rico (Open to Relocate) • [LinkedIn](#) • [GitHub](#)

SUMMARY

Software engineer with 2+ years of building and maintaining web applications for enterprise clients in banking, pharmaceutical, and government sectors. Proficient in JavaScript, TypeScript, React, Vue.js, Node.js, and SQL. Full stack certified (University of Pennsylvania) with a CS degree, Magna Cum Laude. Ships and deploy independent full-stack projects outside of work (see Projects). Bilingual in English and Spanish.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL, HTML5, CSS3, Visual Basic

Frontend: React, Vue.js, Bootstrap, CSS3

Backend: Node.js, Express.js, Laravel

Databases: PostgreSQL, SQL (Azure Data Studio, DBeaver), MongoDB, Redis

Tools: Git, GitHub, Bitbucket, Jira, Vercel, Power BI, REST APIs

PROJECTS

Do You Code Like a Dog? — *React, Vite, React Router, CSS3*

Interactive developer personality quiz matching coding habits to 9 dog breed archetypes. Built with functional components, props, conditional rendering, and client-side routing. Features URL-based result sharing and copy-to-clipboard.

[Live Demo](#) | [GitHub](#)

Raíz Rizada — Curly Hair Weather App — *React, Vite, OpenWeatherMap API*

Weather app that calculates a personalized curl forecast from real-time humidity and temperature. Includes error handling, keyboard support, and porosity-tailored recommendations.

[Live Demo](#) | [GitHub](#)

Stripe API Dashboard — *React, Node.js, SQL, Stripe API — In Development*

ETL pipeline connecting to the Stripe API to extract, transform, and report transaction data, expanding with a React dashboard for visual reporting.

EXPERIENCE

Software Engineer, Ethree Solutions — San Juan, PR

2023 – Present

- Built and maintained frontend interfaces for enterprise clients in banking, pharmaceutical, and government sectors using Vue.js, PHP, and JavaScript
- Developed SQL queries and data pipelines to extract, transform, and deliver reporting data for a banking client processing 300K+ loan cases
- Created interactive Power BI dashboards enabling clients to self-monitor automation progress, reducing support inquiries and improving transparency
- Diagnosed and resolved production bugs across Vue.js and PHP codebases, improving application stability and user experience
- Led handoff and deployment of an Automation Anywhere bot to production on schedule following a team reassignment
- Collaborated with stakeholders to gather requirements, define technical scope, and align deliverables using Jira and Bitbucket

Sales Associate, Old Navy — San Juan, PR

2021 – 2022

- Handled 100+ customer inquiries per shift in a high-volume retail environment; earned Certificate of Achievement for highest loyalty program enrollment in the store

EDUCATION

Bachelor of Arts in Computer Science, Magna Cum Laude

Polytechnic University of Puerto Rico | 2022 | Coursework: Database Systems, Object-Oriented Programming, Data Structures

Certificate in Full Stack Development

University of Pennsylvania (Penn LPS) | 2022 | 24-week intensive: HTML5, CSS3, JavaScript, React, Node.js, Express, MySQL, MongoDB
